

HOW BREEZE AUTOMATED THE UNIQUE NEEDS OF ENGINEER-TO-ORDER FOR EVAC ENGINEERING

EVAC ENGINEERING IS A MEP CONTRACTING ORGANISATION BEING ENGAGED IN MEP DESIGN , ENGINEERING , SUPPLY , INSTALLATION AND COMMISSIONING WHILE MAINTAINING QUALITY COMMITMENT & CUSTOMER SATISFACTION.

EVAC ENGINEERING PROJECTS PVT. LTD. HAS BEEN ESTABLISHED ON 1ST SEPTEMBER, 2011

THE CHALLENGES

- Manual process
- Lack of visibility in timeline
- Disparity in Actual Vs
Projected cost
- Payment issues
- Mismanagement of
resources
- No quality control

Lack of Visibility & Clarity

Due to manual processes, there is no tracking of project leading to confusion, poor decision making and poor delivery.

Mismatch in Actual Vs Projected

Lack of clarity leads to higher expenses leading to heavy losses incurred in project delivery

Mismanagement of Resources

Due to lack of good estimate manpower and resource allocation was not optimised leading to resource misplacement and displacements

Payment issues

Without any resource tracking or monitoring of manpower, it often led to payment issues and disputes

Poor Quality Control

Mismanagement of resources, payment issues, high overhead cost effectively lead to poor delivery quality and lack of any tracking meant no effective way to exert control

A Complex Process of Engineering-to-Order Project Management

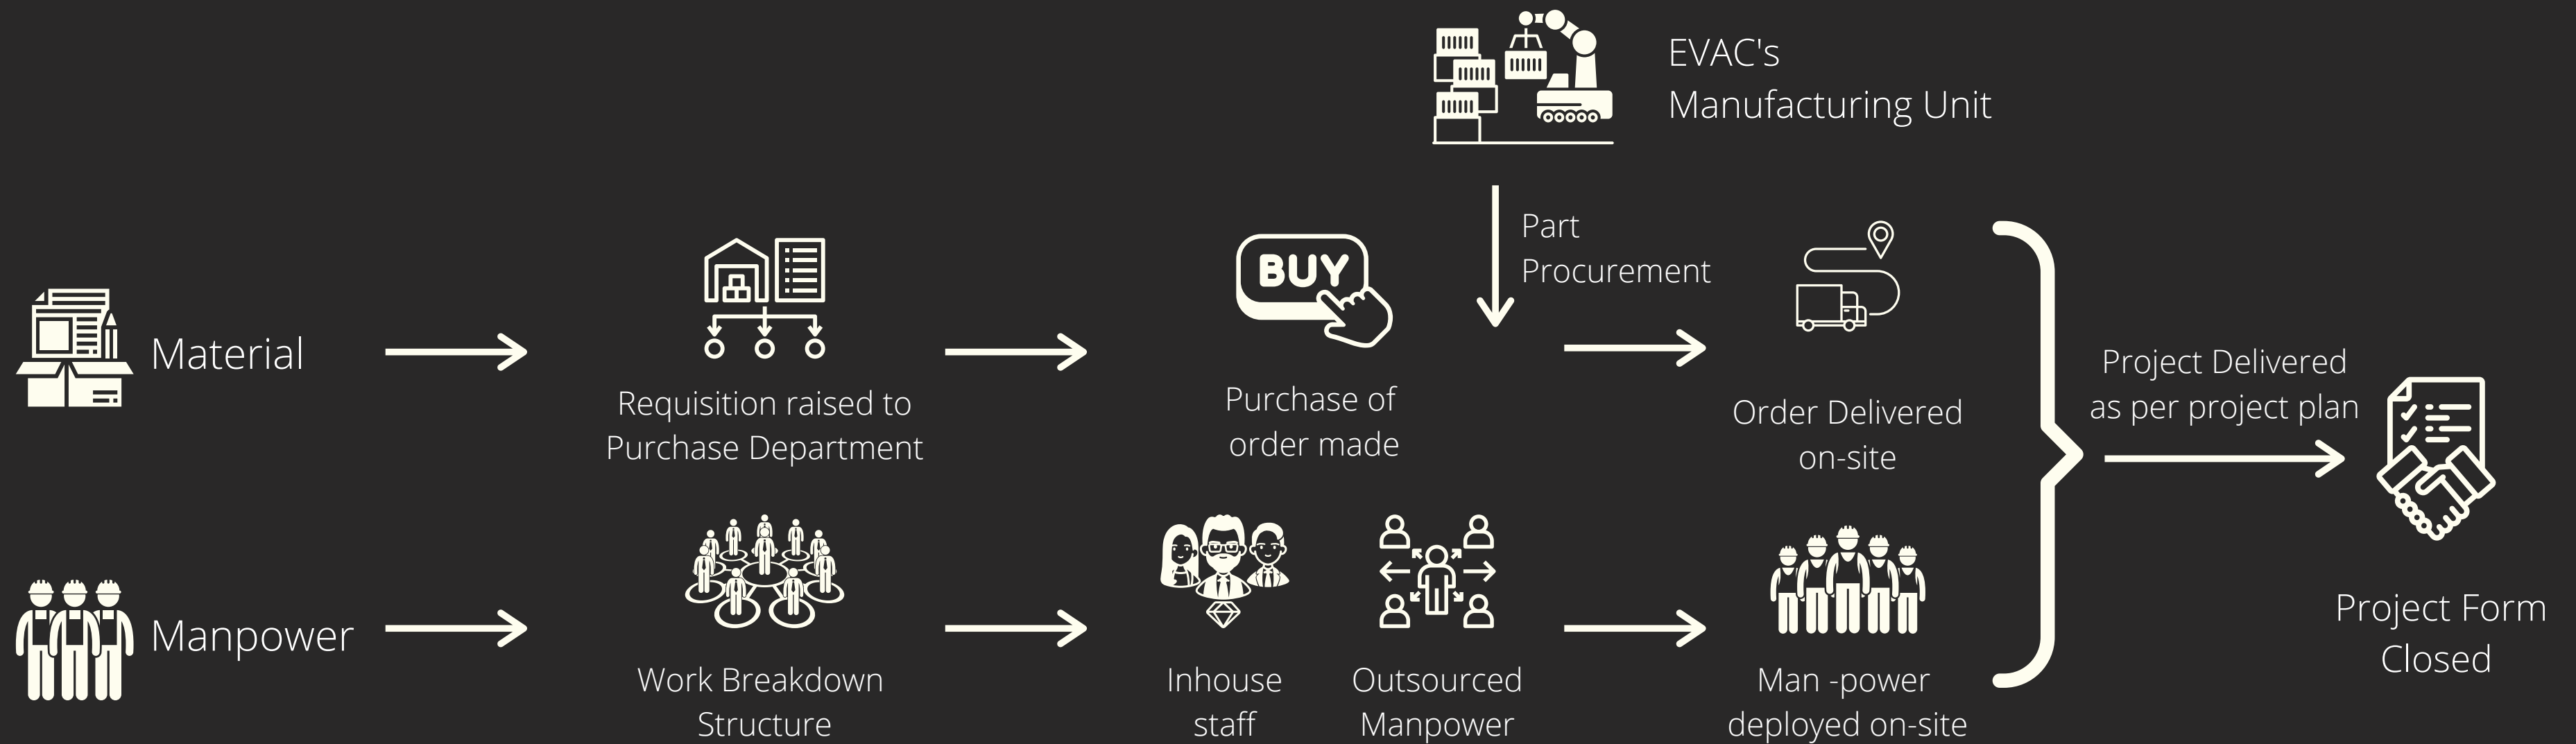

LEAD MANAGEMENT & CRM

PROJECT PLANNING & FINANCIALS MANAGEMENT

INVENTORY, MANPOWER & TRANSPORT MANAGEMENT

BreezeERP Projects Management provided EVAC with specialised planning and tracking tools designed to meet their unique needs of engineer-to-order and make-to-order.

BreezeERP Implemented complete ERP system with PROJECT MANAGEMENT at its core

Modules Implemented: Financial management, Inventory management, Fleet management, service management, project management, HRMS, manufacturing management & CRM

OUTCOME FROM IMPLEMENTATION OF BREEZEERP

PROJECT
PLANNING &
TRACKING

PROJECT
BILLING &
ACCOUNTING

INVENTORY &
RESOURCE
ADMINISTRATION

QUALITY
CONTROL &
PROFITABILITY

PROJECT PLANNING & TRACKING

- Effectively define multiple tasks
- Easily record tasks that need to be subcontracting
- Record and track details
- Map expected results against the actual results
- Identify and analyse the issues and mitigate risks

PROJECT BILLING & ACCOUNTING

- Define project budgets
- Consolidate expenses and revenues
- record account-based project budgets
- Define cost centers and billable & non- billable attributes
- Calculate overall project costs as well as classified costs

INVENTORY & RESOURCE ADMINISTRATION

- Effectively define inventory items used in various jobs
- Allocation of manpower & tagging inventory with them
- Real time tracking of field activity
- Real time resource utilisation dashboard

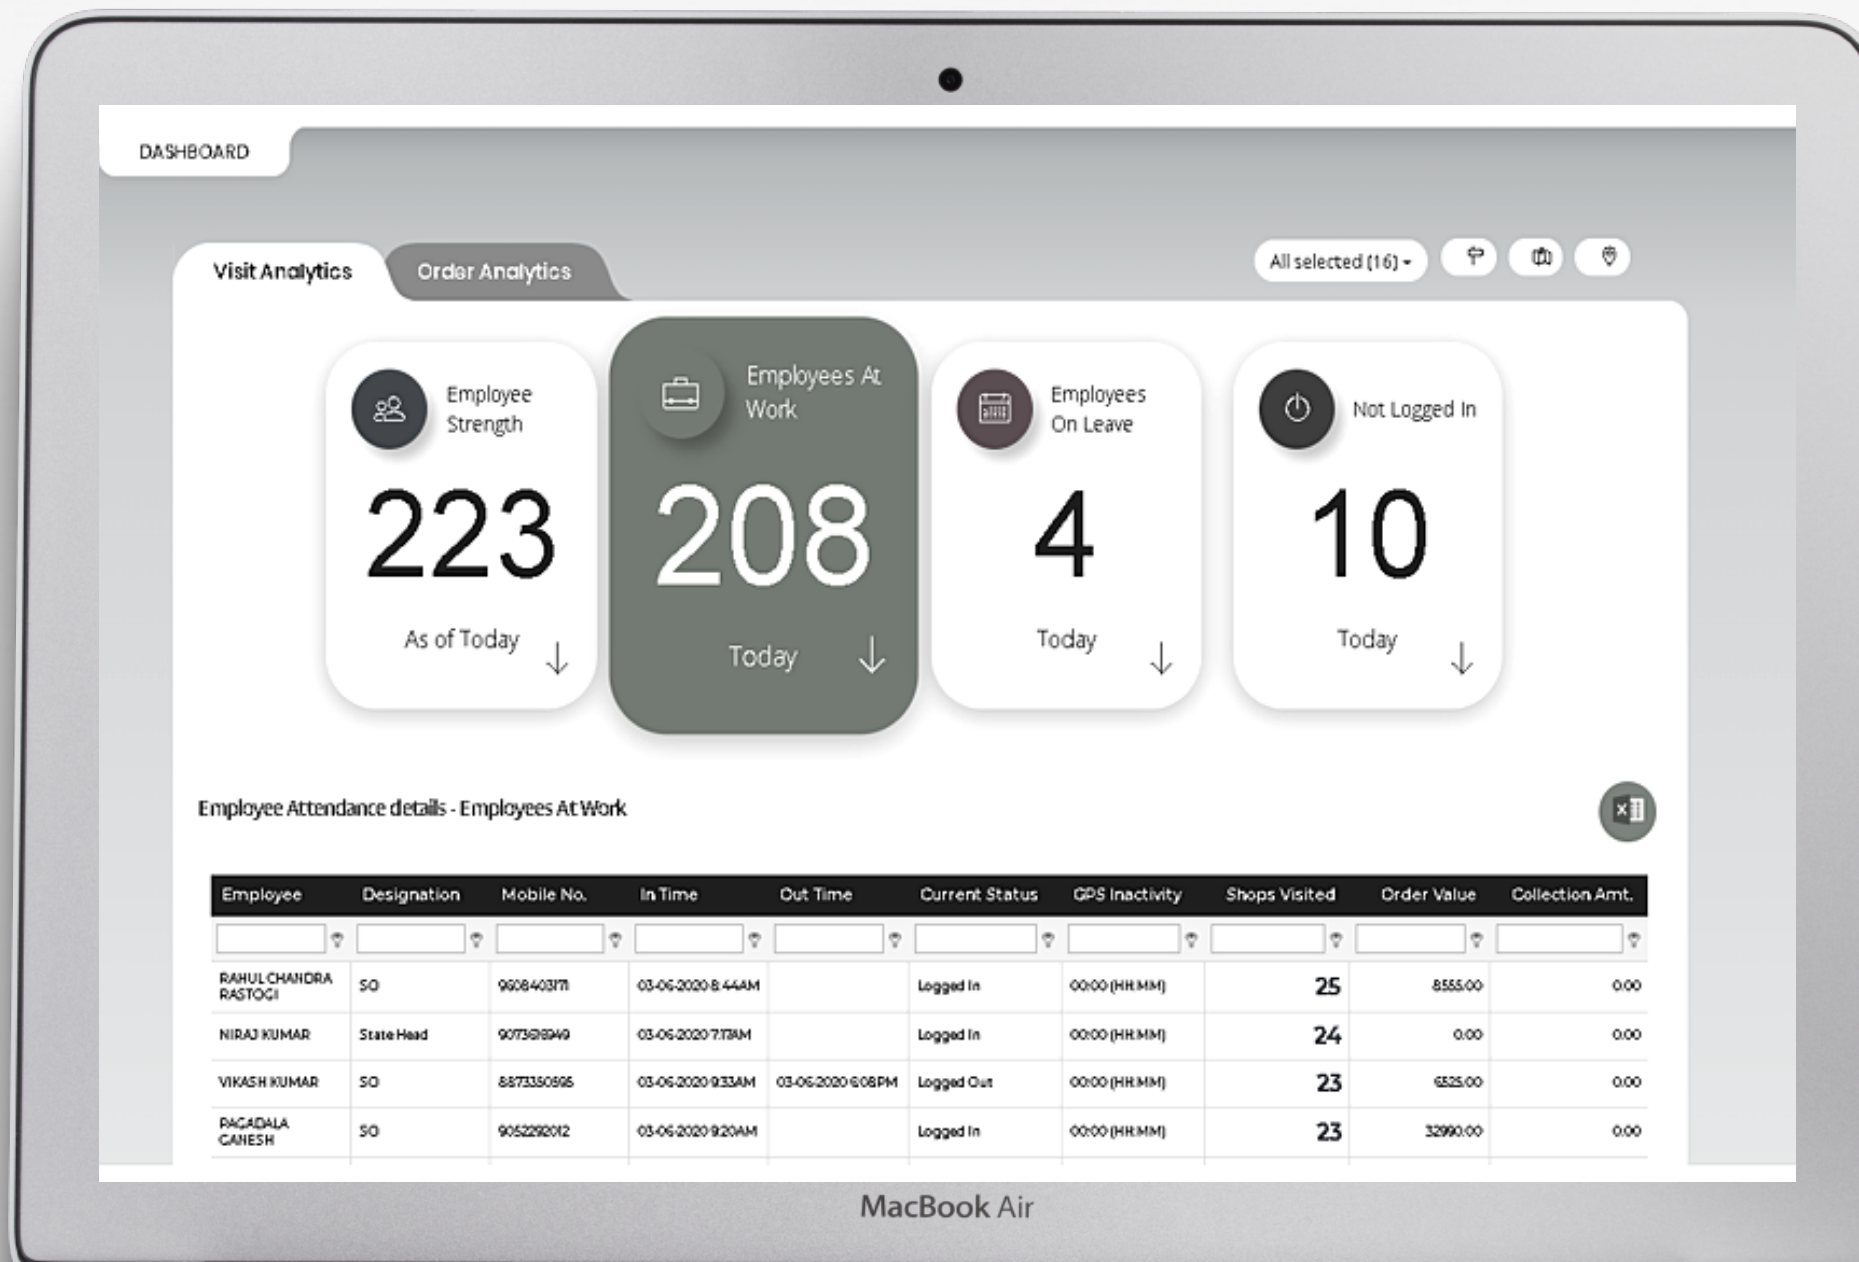

QUALITY CONTROL & PROFITABILITY

- Real time issue tracking & resolution
- Inspection and approval system post job for quality check
- Generate your project's performance report card to ascertain your projects' or sub-projects' profitability
- Reports comparing actual versus planned expenses
