Introduction

End-to-end Automation: Orion Pest Solution Pvt Ltd

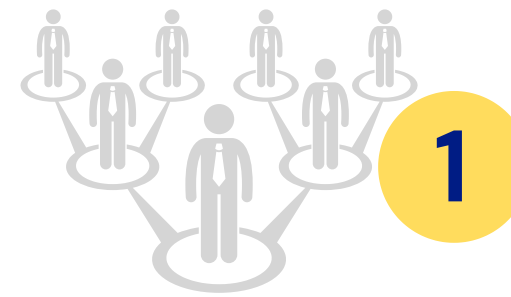

The goal of our in implementing is to bring more clarity and quick access to data. The system AUTOMATES & CONNECTS all aspects of our business with a built in INTELLIGENCE that keeps you updated in real time.

Challenges Faced by Orion

The object was to provide a pest control software that can bring the complete pest control activity under one roof making operation smoother and at the same time provide business intelligence that propels the organisation to become a profit making machine.

With this idea, the complete ERP solution was set to tackle 4 key challenges for Orion Pest Control Pan India operation.

Three tier hierarchy of Customers – Central, State and branches. While, the service are provided unit wise billing done for central.

Automated recurring billing for the complete service period and tracking of payments.

Pan India Inventory, Sales, Service and technician management, tracking and performance evaluation.

Automated GST Filing, e-invoicing and e-way bill generation

BreezeERP – Digital Transformation

Icebreaker

Automating the complete process pan India through implementation of BreezeERP without compromising daily operation.

● NO DELAY

Orion being a company operating in tire2 tire3 cities, it was very important that regular operation cannot be disturbed

● DATA MIGRATION

Extracting data from multiple custom tools, re-structuring and stitching for import into new system.

● TRAINING

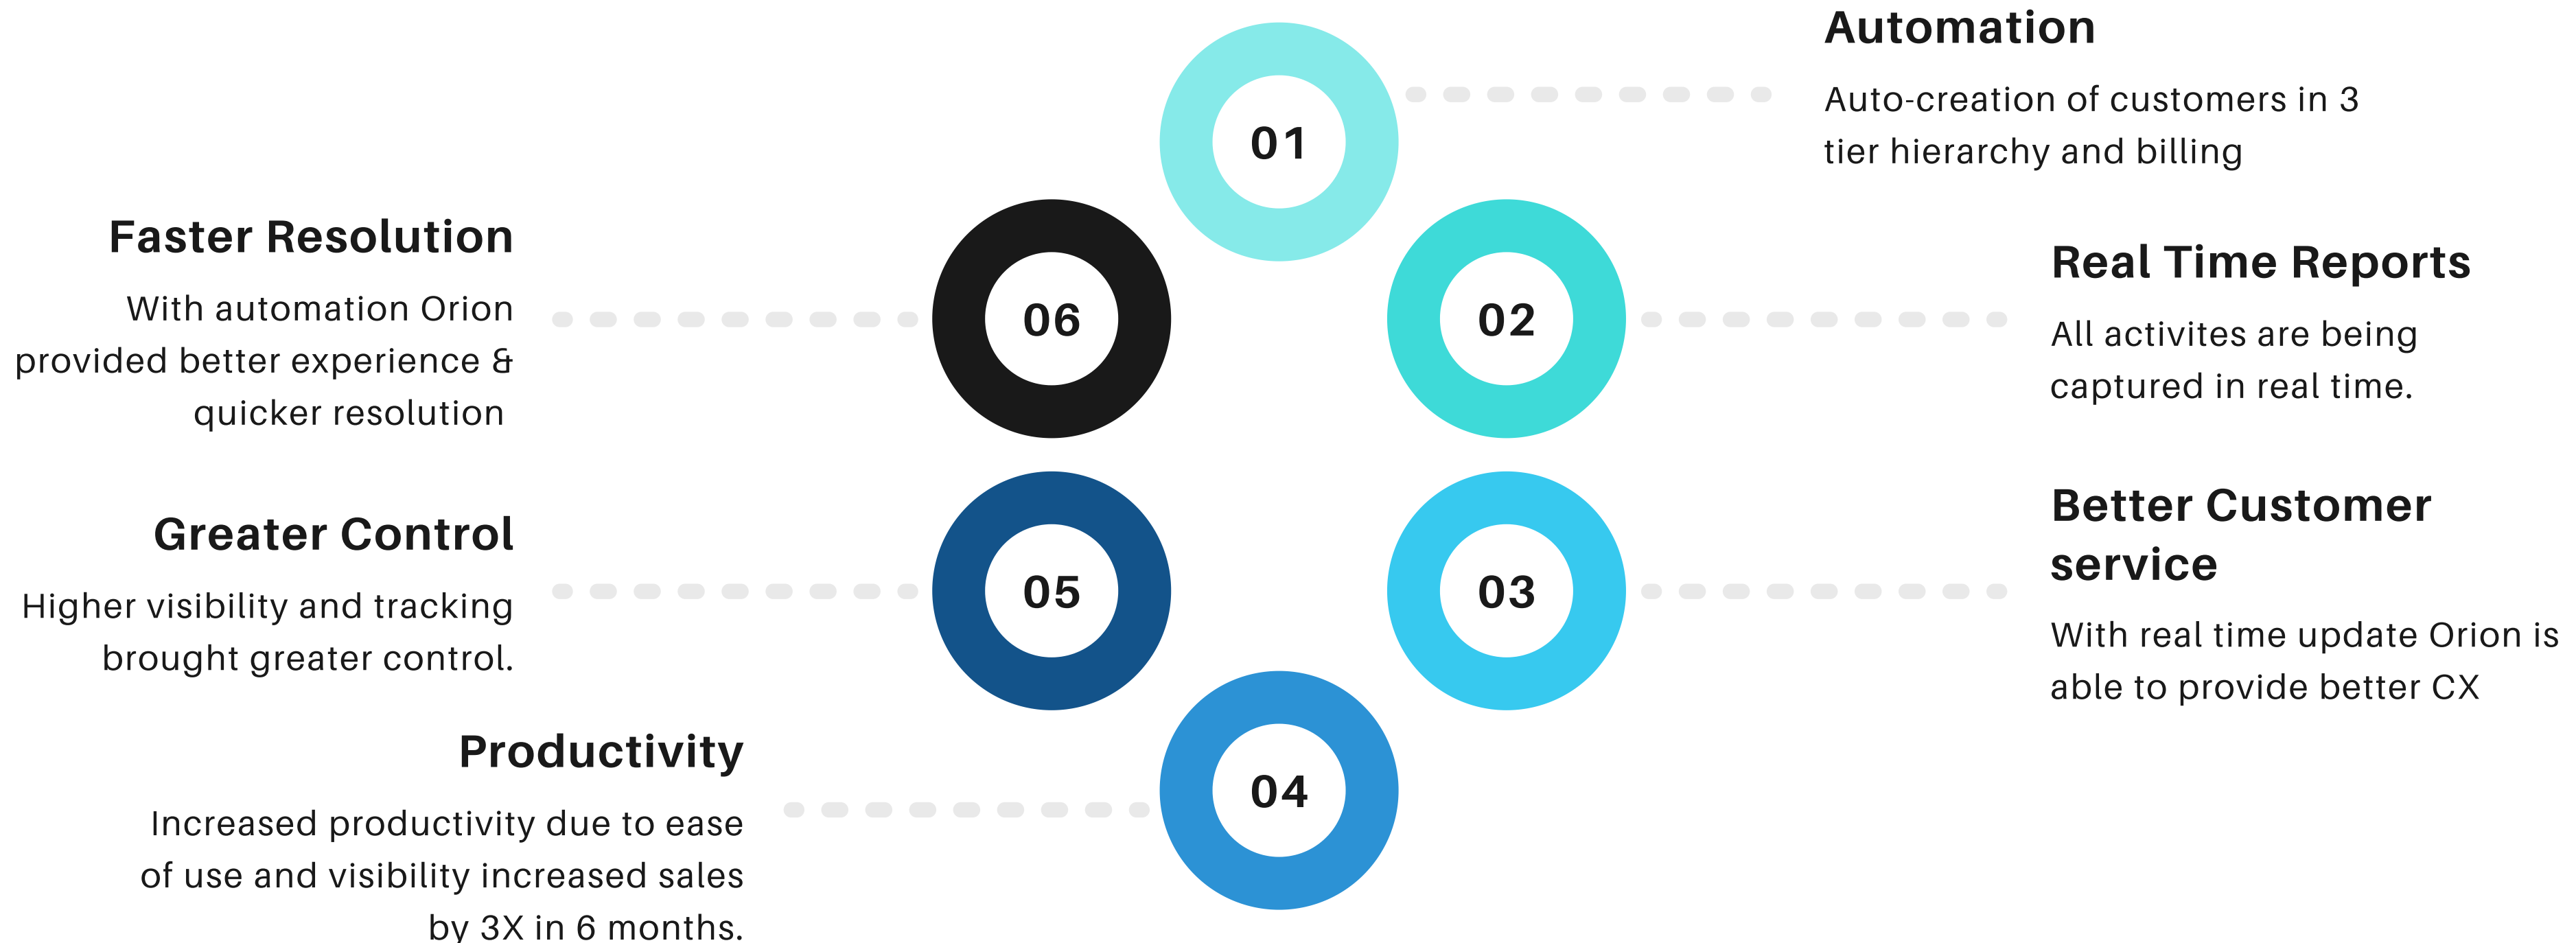

Keep with regular operation & providing training to on group users posed one of the biggest challenge

● INTEGRATION

Implementing complete ERP at a go was impossible. Hence, integration with tools in operation became a chanllange

OUTCOME

BreezeERP implementation for Orion Pest
